

TESTING SOLUTIONS

ENGINE TEST CELLS

B_M

Bava testing solution has developed over time the skills to manage, maintain, update and modify engine, turbojet or turboprop test cells. We have worked alongside several 'prime contractors' assisting them in the transfer and redesign of the existing cells in order to modify them and make them suitable for new technologies; or we have guaranteed the maintenance of the required standards of functionality over time.

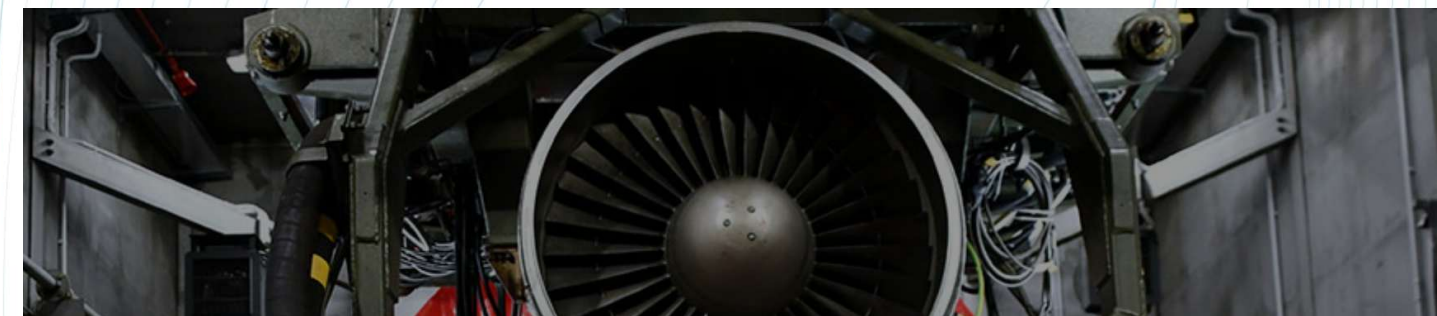

We can work on almost all the test cell fields:

- Aerodynamic
- Instrumental
- Structural
- Accessory systems:
 - Fuel supply & control unit
 - Pneumatic starter
 - Electric starter
 - Engine brake water system
 - Firefighting system
 - Lubrication system
 - Preservation system
 - Drainage and waste water system
 - TBE for test cell

- EJ200
- VIPER
- T55 / T53
- RR250

- RB199
- PW200
- GEM
- CATALYST
